■ Project Report: Smart Expense Tracker

■ Project Overview

The Smart Expense Tracker is a salary-based financial dashboard built to manage income, expenses, savings, and intelligent suggestions. Created as part of my internship at Brainwave Matrix Solutions, this app offers an AI-style UI to monitor and reward good financial habits.

■ File Structure

- dashboard.html – Main UI layout for income and expenses

- dashboard.css – Glassmorphism styled responsive layout

- dashboard.js – JavaScript logic for income/expense/saving logic

- Report.md – Markdown version of project documentation

- Smart_Expense_Tracker_Report.pdf – This PDF report

■ Key Features

- Login system and profile details with modal

- Add income/expense with amount, date, category

- Salary-based logic to detect overspending or reward saving

- Charts: Category-wise pie chart and monthly overview bar chart

- Glassmorphism theme with dark/light toggle and popup effects

■ UI/UX Details

- Light Purple and Sea Green Color Theme

- Glassy curved boxes and animations

- Moving emojis/icons and reward stars

■ Technologies Used

- HTML5

- CSS3

- Bootstrap 5

- JavaScript

- Chart.js (for visual analytics)
