# ■ Project Report: TechZone E-commerce Website

## ■ Project Overview

TechZone is a fully responsive and animated e-commerce website built for showcasing and selling tech gadgets. The goal was to create an immersive shopping experience using modern UI features such as glassmorphism, animations, and product interactivity.

## ■ File Structure

- index.html – Homepage with hero banner, offers, featured products

- shop.html – Product listing with filters, sorting, add-to-cart

- style.css – Custom styles, blink effect, popup animation

- images/ – Product and UI images

- Report.md – Project documentation

## ■ Key Features

- Glassmorphism UI with realistic hover effects

- Popup boxes and blinking effects on tap

- Product rating using stars

- Scroll-based sections like 'New Arrivals', 'Offers', 'Upcoming'

- Responsive layout with Bootstrap 5

## ■ Design Aesthetics

- Color Theme: Light Sea Green + White

- Font: Times New Roman

- UI Effects: Animated gradients, blinking icons, 3D product cards

## ■ Technologies Used

- HTML5

- CSS3

- Bootstrap 5

- JavaScript (for interaction)
